EVERY decent man and good citizen should set himself sternly against all defiers of law. No man is above it. In all constitutionally-governed countries it is, it must be supreme. Even in countries like Rossia and Germany, where the emperors assert the most latitudinarian ideas of government and assume to be the fountain and source of all authority and law, the Public Opinion of the civilized world is acknowledged to be a power which neither William nor Alexander can safely or comfortably dety. The absolutist emperors must plead at the ber of Public Opinion, and they have. Assassination is refore unjustifiable and cannot be defended upon any plea. The contrary of this orized, judges would be afraid to enforce the law, policemen, sheriffs and constables would be subdued, and the pistol and the knife and the bludgeon would arbitrate all differences and difficulties between citizens.

The death of Captain DeLong, the brave commander of the Jeannette, has called out as much of profound sympathy as that of Frankfin, whose name is indissolubly linked with the Arctic regions.
